Have you been exposed to or tested positive for COVID-19?

If you have tested **POSITIVE FOR COVID-19** and have **SYMPTOMS**:

Isolate for

10

DAYS from the date symptoms began.

- **If symptoms fully resolve**, isolation may be shortened and end after day 5 on the first day without symptoms.
- Wear a well-fitting face mask for 10 full days since the start of symptoms. Isolation should not be shortened if a mask cannot be worn properly and consistently.

If you have tested **POSITIVE FOR COVID-19** and have **NEVER HAD SYMPTOMS**:

Isolate for

5

DAYS from the date you had your test done.

- Wear a well-fitting face mask for 5 additional days.
- Isolation should be extended to 10 days if a mask cannot be worn properly and consistently.

If you are **not Up to Date* with your COVID-19 vaccination** and have been in **CLOSE CONTACT** with someone diagnosed with COVID-19:

Quarantine for

10

DAYS from your last exposure.

- Quarantine may be shortened to 5 days if you have no symptoms <u>and</u> test negative for COVID-19 on day 5.
- Wear a well-fitting face mask for 10 days from your last exposure.
- Stay home and get a test if symptoms develop.

If you are **Up to Date* with your COVID-19 vaccination** and have been in **CLOSE CONTACT** with someone diagnosed with COVID-19:

- You do not need to quarantine if you do not have symptoms.
- Wear a well-fitting face mask for 10 full days from your last exposure.
- Get tested for COVID-19 on day 5.
- Stay home and get a test if symptoms develop.

*Up to Date means a person has received all <u>recommended COVID-19 vaccines</u>, including any booster dose(s) when eligible.
