

Black Bears in the Winter

A structure and Function Exercise

Black Bears are not true hibernators, instead they enter a state called _____ in the winter to survive.

Structure: something's form, makeup or arrangement.

Function: something's job, role, task, or responsibility.

Name 3 features (structures or traits) that black bears use to survive in the winter.

How does this structure or trait help the bear to function in the winter?

Example: Thick fur	Example: The black bear's thick fur helps it to stay warm in the cold weather.
