

Winter Wildlife: Bird Migration

Based upon the birds and migration types discussed in the video, draw a line to match the bird species with the type of migration that they use.

Magnolia Warbler

Short-Distance Migration

Northern Cardinal

Medium-Distance Migration

Bald Eagle

Long-Distance Migration

American Robin

Does Not Migrate

Using the word bank below, complete the following sentences:

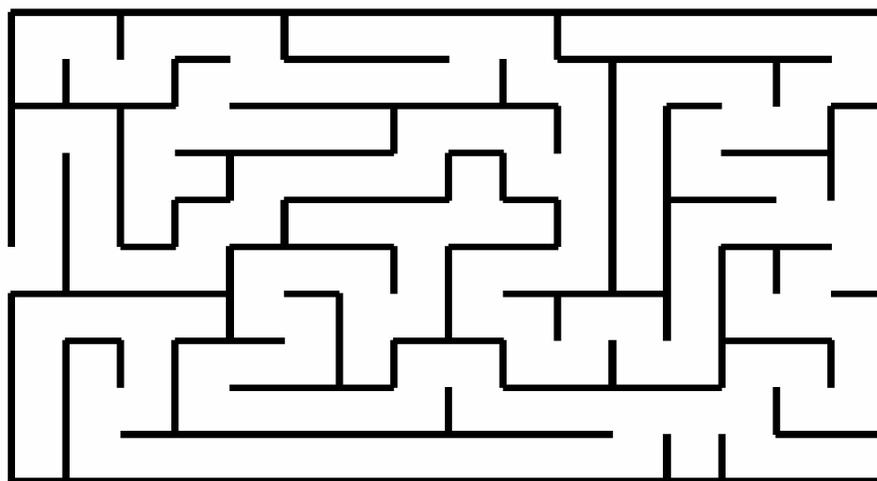

1. The two most common reasons that birds migrate is to have better access to ____ resources in the winter, and _____ in the spring and summer.
2. Bald eagles from the _____ region migrate south during the winter.
3. Small songbirds that use long-distance migration use stores of _____ as their fuel and energy during their journey.
4. Paying attention to _____ maps found within field guides can help you to understand the type of migration that a particular bird uses.

Word Bank: Fat Great Lakes Range Food Nest Sites

Help the American Robin find its way to the plentiful food resources!
