## January 31, 2020 Kentucky Waterfowl Ground Counts

This is the ground count survey for January 27-31, 2020. Temps have stayed fairly mild, though cooler than what we have been experiencing most of the winter. The rains have held off, allowing swollen rivers to reside some. Lake levels continue to remain high; many remain well above normal levels. There is still an abundance of backwater habitat still present. We hope that your duck season finished strong!

Ballard WMA closed on Saturday, 1/4, and finally reopened to hunters on the 29th. We look forward to seeing the results after three weeks of rest. Doug Travis and Boatwright WMA's have roads effected by backwater, so be careful trying to access these WMA's and be aware of the rules that apply during floodwater conditions. See the waterfowl guide online for more info, available on our website.

Habitat across the state is still holding on strong. There was ample moist soil vegetation on most areas and hunt units going into the season, and most of these are still full of food.

Duck season began on Thanksgiving Day, with the first segment running from November 28 – December 1. The second segment of duck season opened on December 7<sup>th</sup>, and NEW THIS YEAR, will run until January 31, 2020. Goose season opened November 28, 2019 and will remain open until February 15, 2020. The western zone youth hunt will be February 1-2, 2020. Also new this year, is the daily bag limit reduction from 2 birds to 1 for Northern Pintail. All other bag limits remain the same. We hope you experienced some luck this year. Even without the heavy straps, I hope you all got to experience some time outdoors with friends and family. Be safe, and enjoy your time afield.

Location	Number	Species Composition	Comments
Ballard	not surveyed due to flood cleanup		Ballard is reopened, but staff did not have time to do a survey this
1/10/2020			week.
Boatwright 1/10/2020	not surveyed due to floods		Due to water being over roads at Boatwright, we did not do a count
1/10/2020			today.
Duck Island	not surveyed		
Doug Travis WMA	not surveyed due to floods		No survey this week due to high water. All access
1/10/2020	,		is by boat until the river recedes below ~41ft.
Sloughs WMA 1/27/2020	7,783 ducks 310 CA geese 4,600 WF geese 9,300 snows 14 Tundra swans	92% Mallard, 8% GW teal, Widgeon, Black Ducks and Pintail.	Birds were active most of the day with a low ceiling and heavy cloud cover. Habitat on Sloughs is good with Pond Creek Marsh elevated making food readily available. During our survey period, birds were seen over much of
			the area and observed
