

### Basics/Getting Started

1. Go to your phones app store and download "Explorer by ArcGIS" (Green and white icon with an arrow).
2. Open app page on your iPhone or Android smart phone
3. Click on the Explorer for ArcGIS app
4. At the bottom of the page select "continue without signing in"
5. The app will then begin its own interactive tutorial on how to use Explorer for ArcGIS
  - a. Read through all tutorial pop-ups completely and then hit the word "close".
6. On the menu, select "find maps." If you do not see the menu and are only looking at a map image of North America, then click on the button in the top left corner to open the menu.
7. Type in the search bar "Kentucky Elk Hunting Areas" or "Kentucky Public Hunting". Then hit the magnifying glass button, in the bottom right of the screen.
8. Click on the image of the map
9. You can now move and zoom in/out on the map as you would a picture on your phone

### Using Explorer for ArcGIS

1. The "Kentucky Elk Hunting Areas" and the "Kentucky Public Hunting" map has several features.
  - a. By touching the screen within the colored portions of the map a speech bubble will appear indicating the feature on the map you have selected. The feature will also be highlighted.
  - b. Click this speech bubble for more information on the feature.
  - c. More often than not, you will select more than one feature when you touch the screen. Again, the features will be highlighted and you can click on the speech bubble to view the features. From there you can select the feature and view a description of it.
2. Customizing your map
  - a. In the bottom left of the map screen is the Legend/layers button
  - b. When you click on this button, two tabs will appear
  - c. The legend tab shows you what the items on the map represent.
  - d. The layers tab controls what is visible on the map. YOU are able to control what is displayed on your map by checking and unchecking the boxes on the right of each layer in this tab.
  - e. **Recommended:** Turn off layers that do not apply to your hunting area. For example, you may not wish to view regulated areas if you aren't signed up to hunt one.
3. Finding where you are...
  - a. At the bottom of the map screen, there is a button at left-center.
  - b. Click this and a small blue dot will appear on the map, this identifies your current location within 100 meters or so.
  - c. To turn this off, simply click the button again and the blue dot will disappear.

**More Maps**

1. You can view other KDFWR maps by opening your menu and touching the 3 stacked dots to the right of the "current map" section.
2. Then select "Find other maps by kdfwr@1kfwis"
3. This should bring up all of the maps put out by KDFWR for this app.
