

# CITES Tag Attachment for Bobcats and River Otters

Pursuant to 301 KAR 2:251, a CITES tag shall be attached to the raw fur, pelt, or unskinned carcass upon receipt of the tag from the department per the instructions provided by the department and remain attached until it is processed or exported outside the United States. Possession of an unused CITES tag issued by the department is prohibited.

## Whole carcass

1. Between the animal's upper lip and gums, separate the skin up to the eyehole.
2. Insert tag under skin from under the upper lip through the eyehole and fasten.
3. Make sure tag is securely fastened.

## Hide/pelt only

1. Insert tag into mouth, through eyehole and fasten.
2. Make sure tag is securely fastened.
